

Get CoPilot right the first time

The **smarter** way to adopt AI and see value faster.

We know AI is essential for productivity and innovation. Copilot for Microsoft 365 is a clear path to bringing the power of Gen AI to your workforce. But adoption isn't easy. In fact, organizations have more questions than answers.

When adopting CoPilot, how can you:

Fill skills gaps?

Maximize personalization?

Drive adoption?

Identify who will benefit most?

Speed up time-to-value?

Address privacy and security concerns?

Above all, **can you afford the wasted time and cost of a failed experiment?** You won't have to with the right experts. You need an experienced partner with the dedicated planning, implementation, and optimization services to ensure you get Copilot right the first time.

Innovate, adapt, and scale constantly.

Our complete suite of end-to-end services will ensure secure implementation, help realize ROI, maximize business value, and prioritize hyper-personalized experiences. Five services are included and the outcomes speak for themselves:

- **Release value with data-driven decisions** on where in your business AI will make the biggest impact.
- **Get going fast with seamless rollout** including business case building and speedy implementation.
- **Drive employee efficiency and retention** with user training and hyper-personalization.
- **Optimize and scale safely** with our expertise in responsible AI, robust data governance, and tailored extensions.
- **Ongoing global support** from Lenovo's team of experts.

Your smarter path to Copilot adoption
